Protecting Your Company's Most Valuable Asset: Your Good Name

What Every Lawyer, Marketer, and Executive Should Know About U.S. Trademark Law

April 9, 2008

Keith Barritt Fish & Richardson P.C.

With In-House Perspective by Julie Ortmeier, Senior Counsel American Red Cross

Fish & Richardson

Intellectual Property | Litigation | Corporate

Topics To Be Covered

- What is a trademark and why should I care?
- What makes a good trademark?
- How do I acquire trademark rights?
- What does registering a trademark mean?
- How do I protect my trademark rights?
- Can I use trademarks owned by others?
- How can I license or sell my trademark rights?

Fish & Richardson

Intellectual Property | Litigation | Corporate

What Is A Trademark?

- Trademark (narrow and broad meanings)
 - Anything that identifies that goods bearing that mark come from a single source (even if the source is unknown)
- Service mark
 - Identifies a single source of services
- "Trade name" (company name) is technically not a trademark
 - Same trademark law generally applies
 - Can be the basis of infringement suits
 - Often used as a mark, but if only used as a trade name not registrable at the U.S. Patent and Trademark Office

Intellectual Property | Litigation | Corporate

What Is A Trademark? (cont.)

- Certification Marks
 - Certify that the goods or services comply with the mark owner's standards
 - GOOD HOUSEKEEPING seal of approval
 - UL for compliance with Underwriters Laboratories' electrical safety standards
- Collective Membership Marks
 - Identify membership in an organization
 - College fraternity marks
- Collective Trademarks
 - Used by members of collective to identify goods or services
 - PGA for golf lessons

Intellectual Property | Litigation | Corporate

Trademarks Are Not Patents or Copyrights

- Trademarks *identify source* of goods or services and, with continued use, can last forever
- Patents are government-issued monopolies for new and nonobvious *inventions* (functional features of processes, machines, manufactured items, or composition of matter) and last 20 years from date application filed
- Copyrights protect original *works of authorship* (literary, musical, sculptural, etc.) and have a long but limited life

Intellectual Property | Litigation | Corporate

Purpose of Trademark Law

- Trademark Law Serves Two Basic Functions:
 - 1) Protect consumer expectations
 - Prevents consumer confusion, fraud, and "passing off"
 - Lowers consumer search costs by enabling reliance on trademarks as indicators of consistent quality
 - 2) Protect trademark owner's investment
 - Gives mark owner control over the "goodwill" or "reputation" represented by the mark

Intellectual Property | Litigation | Corporate

Types of Marks

Word marks:

Basic word mark

Stylized word mark

Word & logo combined

Intellectual Property | Litigation | Corporate

Types of Marks (cont.)

- Slogan: GE's "We bring good things to life"
- Symbol: Nike "swoosh" or the American Red Cross emblem

Intellectual Property | Litigation | Corporate

Types of Marks (cont.)

- Sound: The 3-note chime for NBC (Harley "vrooom vrooom"? Motorola "chirp"?)
- Color: The color pink for Owens-Corning's fiberglass insulation
- Smell: Scented yarn
- Non-functional shape of packaging or of product itself ("trade dress"): The shape of the Coca-Cola bottle

Intellectual Property | Litigation | Corporate

Why Should I Care?

- 1. Google \$66.4 billion
- 2. General Electric \$61.9 billion
- 3. Microsoft \$55 billion
- 4. Coca-Cola \$44.1 billion
- 5. China Mobile \$41.2 billion
- 6. Marlboro \$39.2 billion
- 7. Wal-Mart \$36.9 billion
- 8. Citigroup \$33.7 billion
- 9. IBM \$33.6 billion
- 10. Toyota \$33.4 billion

Intellectual Property | Litigation | Corporate

The "Spectrum" of Marks

- Four possible categories into which virtually all potential trademarks fall
 - 1) Arbitrary/Fanciful
 - 2) Suggestive
 - 3) Descriptive
 - 4) Generic
- Determines general level of protection
- Key aspect of U.S. trademark law

Intellectual Property | Litigation | Corporate

- Arbitrary or Fanciful Marks
 - Inherently distinctive = Immediately protectable
 - Do not have any connection with the nature of the goods or services
 - Arbitrary mark examples: APPLE computers; BIRDS' EYE frozen vegetables; CAMEL cigarettes
 - Fanciful mark examples: KODAK film; EXXON oil

Intellectual Property | Litigation | Corporate

- Suggestive Marks
 - Inherently distinctive = Immediately protectable
 - Suggest or "hint at" the nature of the goods or services
 - Examples: CHICKEN OF THE SEA tuna; COPPERTONE suntan lotion; CARAVAN minivans

Intellectual Property | Litigation | Corporate

- Descriptive Marks
 - Merely describe a quality or feature of the goods (including geographically descriptive marks and surnames)
 - Examples: SUDSY soap; TEXAS INSTRUMENTS electronics; MRS. FIELD'S cookies
 - Require "acquired distinctiveness" in order to protect to demonstrate public now perceives the descriptive term as a source-identifying mark

Intellectual Property | Litigation | Corporate

- Demonstrating "Acquired Distinctiveness"
 - Substantially exclusive and continuous use as a mark
 - 5 years use alone may be enough, maybe more, maybe less
 - Evidence of extensive advertisements using the descriptive term as a mark
 - Customer declarations or surveys
 - Evidence of consumer confusion
 - Evidence of copying by competitors
 - Owner's intent or commercial success is not enough
 - Example: HEARTWAVE cardiac disease diagnosis equipment; WINDOWS software

Intellectual Property | Litigation | Corporate

- Generic Terms
 - Unprotectable
 - Common English (or foreign language) words for the goods or services
 - Examples: SERVICE STATION for gasoline stations; YELLOW PAGES for yellow-colored telephone directory books; KAVA (Serbian for coffee)
 - Think "ADVIL" (trademark) and "ibuprofen" (generic)

Intellectual Property | Litigation | Corporate

The Spectrum of Marks Summarized

Strong

1

Weak

Inherently Distinctive/ Immediately Protectable	Requires "Acquired Distinctiveness" In Order To Protect	Unprotectable/ Unregistrable
Arbitrary/Fanciful	Descriptive	Generic
Suggestive	Primarily a surname	Flag/Coat of arms
	Primarily geographically descriptive	Immoral/Scandalous Deceptive
	Deceptively misdescriptive	Functional shapes
	Color	
	Product configurations	
	Ornamental	

16

Intellectual Property | Litigation | Corporate

Special Rules for "Trade Dress"

- Trade dress is the image created by the product or packaging, including size, shape, color, texture, graphics, etc.
 - Must be "non-functional" to protect (i.e. no competitive advantage to design)
- Product Configuration vs. Product Packaging
 - Product configuration always requires "acquired distinctiveness" to protect
 - Product packaging may be inherently distinctive

Intellectual Property | Litigation | Corporate

Special Rules for "Trade Dress" (cont.)

- Examples of trade dress:
 - Coca-Cola bottle
 - Campbell's soup can
 - The shape of a Ferrari automobile
 - Restaurant/retail store/pool hall layout
 - "Marlboro Country" advertising campaign

Intellectual Property | Litigation | Corporate

Special Rules for "Trade Dress" (cont.)

Trade dress in shape, color, and configuration of container "cap" found protectable and infringed:

Intellectual Property | Litigation | Corporate

Special Rules for "Trade Dress" (cont.)

But trade dress in product packaging found not infringed:

Intellectual Property | Litigation | Corporate

Do's & Don'ts for Selecting a Trademark

- DO choose a mark that is arbitrary, fanciful, or suggestive (inherently distinctive)
- DO choose a mark that is easy to pronounce and remember
- DO consider developing a "family" of related marks
- DO NOT choose a mark that is merely descriptive or generic
- DO NOT choose a mark that has negative connotations in English (ENTERON) or foreign languages (NOVA)
- DO NOT choose a mark that may become passé in a few years (GATEWAY 2000)

Fish & Richardson

Intellectual Property | Litigation | Corporate

Trademark searching

- Search not legally required, but advisable
 - "In-house" search
 - "Full" search

Limits of searching

- Unregistered users may be hard to find
- Subjectivity of comparing trademarks
- Conflicts based on meaning
- Foreign mark owners entitled to file in U.S. within six months of foreign application and get earlier priority date

Intellectual Property | Litigation | Corporate

Acquiring Trademark Rights

- Rights arise by use The "first user" principle
- "Use" of a mark in the "ordinary course of trade"
 - Use on goods
 - Use with services
- Without federal registration, rights limited to territory where mark actually used/reputation extends
 - Multiple parties in areas remote from each other can develop rights in the same mark, if the second user adopted the mark in "good faith"

Fish & Richardson

10 Benefits of Federal Registration of Trademark Rights

- Mationwide "constructive use" as of application date
 - But prior user retains rights in established geographic area
- Nationwide "constructive notice" of ownership as of registration date
 - Prevents others from claiming their adoption/expansion of use of mark was in "good faith"
- Evidence of validity and exclusive ownership of mark
- Heightened protection after five years, with possibility of becoming "incontestable"
- Listing on registry discourages others from using a similar mark

Fish & Richardson

10 Benefits of Federal Registration of Trademark Rights (cont.)

- Protection against registration of similar marks
 - USPTO can cite prior registrations against applications for similar marks
- Right to use ®
- Right to sue in federal court and possibly obtain treble damages and attorney fees
- Basis for foreign registrations
- Right to block imports that infringe the mark or are counterfeits
 - Must "record" the trademark registration with U.S. Customs and Border Protection

Intellectual Property | Litigation | Corporate

Bases for Filing U.S. Trademark Applications

U.S. Applicants:

- Use-based trademark applications
- Intent-to-use ("ITU") applications
- Foreign Applicants may also file based on:
 - Ownership of a pending foreign application
 - Ownership of a foreign registration
 - by treaty, use in U.S. commerce not required if U.S. registration based on ownership of foreign registration

Intellectual Property | Litigation | Corporate

Filing a Trademark Application with the USPTO

Application must contain:

- drawing of the mark
- identification of goods/services
- eventually a "specimen" showing mark as actually used in U.S. commerce with goods/services (except foreign applicants relying on foreign registration)
- Application review by attorney at USPTO
- Publication and potential opposition by third parties
- Issuance of registration (renewable every 10 years with continued use)
- Supplemental Register available for merely descriptive marks

Intellectual Property | Litigation | Corporate

Unregistrable Marks

- Flag or other official insignia of the U.S., any state, or any foreign country
- Name/likeness/signature of any (publicly recognized) living individual without written consent
- A term that is deceptive, immoral, scandalous, disparaging, or which falsely suggests a connection with any person, place, or thing

Intellectual Property | Litigation | Corporate

Unregistrable Marks (cont.)

- Other U.S. Government regulation of "deceptive" or confusing marks:
 - FDA regulates drug and dietary supplement names for deceptiveness, unauthorized drug claims, and potential confusion (e.g. ROGAINE and HERBAL PROZAC)
 - FTC has issued guidance on trademarks for dietary supplements (e.g. ARTHICURE may improperly imply product provides a cure for arthritis and be deceptive)
 - EPA has proposed formal regulation of trademarks for pesticides to prohibit "misleading" marks (e.g. GERM SHIELD improperly implying 100% effectiveness)

Intellectual Property | Litigation | Corporate

Foreign Trademark Registration

- Under Paris Convention, foreign filings made within 6 months of first filing are entitled to "priority date" based on first filing date
 - Not a "bar date"; applications filed after six months simply treated as filed on actual date of filing
- Costs vary (\$1,000 \$3,000 per country)
- Single European Community trademark registration available

Intellectual Property | Litigation | Corporate

Foreign Trademark Registration (cont.)

- Madrid Protocol
 - Single filing through USPTO designating multiple member countries in which protection is sought, based on ownership of U.S. registration or application
 - "International registration" issued by World Intellectual Property Organization, reviewed by national trademark offices under normal trademark law standards
 - Single filing through WIPO for renewals, change of ownership
 - May limit the scope of protection otherwise available under direct national filing

Intellectual Property | Litigation | Corporate

Foreign Trademark Registration (cont.)

- In many countries use not required for registration, but registration may be cancelled for non-use
- The same general examination and opposition procedures exist in most foreign countries
- Connotation considerations
 - "bite the wax tadpole"
 - "leaky" PARKER pens

Intellectual Property | Litigation | Corporate

Protecting Trademark Rights

- Infringement
- Counterfeiting
- Dilution
- Cybersquatting
- Generification
- Abandonment

Fish & Richardson

Intellectual Property | Litigation | Corporate

Trademark Infringement

- Is the mark *likely to cause consumer confusion* as to the goods' or services' *source/sponsorship/affiliation*?
 - Strength of the plaintiff's mark
 - Similarity of the marks (sight/sound/meaning and doctrine of foreign equivalence)
 - Proximity of the goods (DELTA and DOMINOS)
 - Likelihood of expansion of the product lines
 - Evidence of actual confusion
 - Marketing channels used
 - Purchaser sophistication/degree of care
 - The second user's intent in selecting the mark

Intellectual Property | Litigation | Corporate

Trademark Infringement (cont.)

Red Cross enforcement examples:

Intellectual Property | Litigation | Corporate

Counterfeiting

- Counterfeit mark defined as a "spurious mark which is identical with, or substantially indistinguishable from, a registered mark" (i.e. an intentional copying of someone else's trademark to defraud consumers)
- Courts may issue orders authorizing pre-suit seizure of suspected counterfeits
- Federal criminal penalties and mandatory monetary remedies
- Use of genuine label on fake goods can still be counterfeiting (e.g. refilling Coke bottles with another beverage, or using GE packaging for non-GE parts)

Fish & Richardson

Intellectual Property | Litigation | Corporate

Trademark Dilution

- The lessening of the capacity of a "famous mark" (widely recognized by the consuming public) to identify and distinguish goods or services
 - Goldfish-shaped crackers in snack food mix yes
 - GREATEST SNOW ON EARTH for tourism no
- "ikelihood of dilution" is sufficient
- Forms of dilution
 - Blurring (BUICK aspirin; TIFFANY sneakers)
 - Tarnishment (YARDMAN'S use of scared JOHN DEERE deer logo)

Intellectual Property | Litigation | Corporate

Cybersquatting

- U.S. law: Bad faith intent to profit resulting from "registering, trafficking in, <u>or</u> using" a domain name confusingly similar to the trademark of another
 - Allows recovery of up to \$100,000 in statutory damages per domain name, in addition to transfer or cancellation of the domain name
- International arbitration ("UDRP"): bad faith resulting from "registering <u>and</u> using" a domain name confusingly similar to the trademark of another
 - No monetary damages, only transfer or cancellation of the domain name

Intellectual Property | Litigation | Corporate

Cybersquatting (cont.)

Intellectual Property | Litigation | Corporate

"Generification" of a Trademark

- If consumers regard a term as primarily referring to a type of goods or services rather than as a mark, it can become generic and unprotectable
 - Examples: aspirin, dry ice, cellophane, nylon, kerosene, lanolin, milk of magnesia, escalator, thermos, shredded wheat
 - On the edge? XEROX, KLEENEX, JELLO, JEEP, FREON, MACE, etc.

Intellectual Property | Litigation | Corporate

Avoiding "Generification"

- Ensure proper use of a mark by the mark owner
 - Use marks as adjectives, not as nouns (VASELINE petroleum jelly; SCOTCH brand adhesive tape)
 - Don't use marks as verbs, plurals, or possessives
 - Be wary of using two adjacent marks
- Use a trademark notice
 - Unregistered marks use TM or SM
 - Federally registered marks use ®
 - Lack of notice can preclude recovery of monetary damages in an infringement suit
- Correcting improper use of marks by others

Intellectual Property | Litigation | Corporate

Avoiding "Generification" (cont.)

- Adopt and Use Guidelines For Trademark Usage
 - Mark should be prominently placed on goods and packages
 - Use only approved typography, color, graphics, placement, style, etc.
 - Usage should be consistent
 - Advertising and product labeling should be routinely reviewed to ensure that each mark is in fact properly used

Intellectual Property | Litigation | Corporate

Avoiding Abandonment

- Non-use for significant period of time with intent not to resume use
- Non-use for three years without reasonable excuse creates presumption of abandonment
- Declaration of use required for federal registrations between the 5th and 6th year of registration and at 10 year renewals
- De minimis use merely to maintain rights in the mark may not be sufficient (use "in the ordinary course of trade" required)

Intellectual Property | Litigation | Corporate

Using Trademarks Owned By Others

- Comparative ads/compatibility claims are generally permissible
- Be fair and truthful and avoid disparagement
- Give proper attribution of others' ownership of their marks
- Avoid implied endorsement of your goods/services by others
- Avoid stylized forms of others' marks
 "COCA PUFFS made with real HERSHEY'S chocolate"

Fish & Richardson

Intellectual Property | Litigation | Corporate

Trademark Licensing

 License agreement must contain quality control measures, or else licensor risks loss of all rights in the mark

• Other elements:

- The mark (stylized? design logo?)
- Trademark usage/approval requirements
- Field of use (goods/services)
- Geographic scope of license
- Exclusivity
- Royalty and accounting provisions
- Term of license/renewal
- Termination clause

Intellectual Property | Litigation | Corporate

Trademark Licensing (cont.)

- Use by licensee inures to the benefit of the licensor
- License may need to be recorded in some countries
- It is vital to monitor quality control or risk abandonment of the mark

Intellectual Property | Litigation | Corporate

Assignment Considerations

- Trademarks can be assigned with the "goodwill" of the business associated with the mark (i.e. the ability to carry on prior owner's business under the mark)
- Assigning intent-to-use application without the goodwill of an ongoing business to which the mark pertains will invalidate the application
- Assignment must be in writing
- Assignments should be recorded with USPTO

Intellectual Property | Litigation | Corporate

Keith Barritt Fish & Richardson P.C. barritt@fr.com
