Overview

About Aaron

Aaron Pirouznia is an associate in the Dallas office of Fish & Richardson P.C. Mr. Pirouznia's practice includes all areas of commercial and intellectual property litigation, with an emphasis on complex patent litigation. He has worked on both offensive and defensive matters, litigating cases through trial and appeal.

Specifically, he has handled pre-suit due diligence and fact and expert discovery — including taking depositions, preparing expert reports, and developing technical positions on infringement and invalidity. He has drafted substantive motions, including claim construction and summary judgment.

Mr. Pirouznia has also examined witnesses in open court and successfully argued case dispositive motions and claim construction positions. Prior to law school, Mr. Pirouznia worked at General Dynamics C4 Systems as an electrical engineer, where he designed, developed, and installed satellite communication control systems, including a NASA Deep Space Network antenna.
