Overview

About Allison

Allison Ramsey is a technology specialist in the Dallas office of Fish & Richardson P.C. Her practice focuses on patent prosecution support in the life sciences, medical devices, and academic research industries. Ms. Ramsey's technical background includes electronics, biotechnology, control systems, and diagnostic device design.

Prior to joining Fish, she completed a quality engineering co-op at a multinational medical equipment manufacturing company where she acquired, validated, and implemented vision based manufacturing aids. Ms. Ramsey has substantial experience in point of care diagnostics, specifically relating to paper-based microfluidic diagnostic tests. She gained experience as a manufacturing engineer at a not for profit company focused on paper-based microfluidic diagnostics for low resource areas prone to HIV and hepatitis C. Additionally, her capstone project in a Boston University lab addressed high rates of untreated cervical cancer in low resource areas using microfluidic paper diagnostics.
