

Andrew Fraine, Ph.D.

Technology Specialist

Boston

617-956-5995

fraine@fr.com

Overview

Andrew Fraine focuses his practice on patent prosecution in the electrical and computer technology industry.

With over a decade of on-the-ground industry experience, Andrew has worked with a wide range of technologies, particularly software, data science solutions, and artificial intelligence. Prior to joining Fish & Richardson, Andrew served as co-founder, software engineer, and data scientist at digital asset management software company Automata, where his accomplishments included launching a generative AI-powered content repurposing SaaS platform for content marketing applications.

As a Ph.D. student and researcher in quantum optics in Boston University's Department of Electrical and Computer Engineering, Andrew presented a thesis on the practical applications of quantum optical entanglement in industrial settings and real-world measurement scenarios.
