## Overview

---

### About Beau

Beau Mersereau is the Chief Legal Technology Solutions (LTS) officer at Fish & Richardson P.C. He specializes in building, leading, and retaining teams that deploy cutting-edge technologies aimed at modernizing the way the firm serves its clients. His teams have built custom software solutions using the latest technologies that are transforming the legal industry, including cloud-based services, data analytics, artificial intelligence, and others. Beau takes a collaborative approach to innovation, working directly with clients, attorneys, and industry specialists to identify novel approaches to the practice of law and implement solutions that best meet clients' needs.

During his tenure at Fish, Beau has overseen the development of numerous proprietary tools and solutions such as OutLaw, SharkTank, and Power Docket that help the firm manage its attorney-client relationships more efficiently. Several of these tools have won awards for technological innovation, including the International Legal Technology Association (ILTA) Innovative Project of the Year (SharkTank), and Law Technology News' Most Innovative Use of Technology by a Large Law Firm (Outlaw and iOutlaw).

A globally-recognized thought leader and expert in the field, Beau regularly briefs clients on emerging technology offerings and speaks at international and domestic conferences covering emerging trends in the legal industry.
