## Overview

---

### About Benjamin

Benjamin Halkowski is a technology specialist in the Washington, D.C., office of Fish & Richardson P.C. Prior to joining the firm, Mr. Halkowski worked in the semiconductor industry researching and building next-generation lithography tools. He currently manages a complex patent docket for a wide variety of clients ranging from multinational technology companies and financial services to startups and individual inventors. Mr. Halkowski's practice focuses on patent drafting and prosecution in the areas of computer software, machine learning, artificial intelligence, deep learning, computer vision and image processing, robotics, digital health technologies, e-commerce, financial services, drone technology, authentication systems, and more.
