## Overview

Daniel Jang focuses his practice on helping clients manage their patent portfolios and secure strong patents for a wide range of technologies.

Daniel's legal practice includes drafting patent applications and responses to office actions, conducting patentability analysis, and performing due diligence investigations, as well as representing clients in *inter partes* reviews and other post-grant proceedings. With an academic and industry background in chemical, electrical, and computer engineering, he is adept at working with a variety of inventions, such as electrical and computer technology, software, medical devices, autonomous vehicles, and chemical innovations.

Prior to beginning his career in law, Daniel worked for a biopharmaceutical company's patent strategy team and assisted with patent clearance investigations and patent litigation. He also served as a first lieutenant in the Republic of Korea Air Force.

During law school, Daniel served as associate editor of University of Illinois College of Law's *Elder Law Journal*. He also participated in the university's Intellectual Property Clinic, where he worked directly with university-based startup companies to research, analyze, and advise them regarding preparation of trademark and patent applications.
