Overview

About Elliot

Elliot Scher is an associate in the Southern California office of Fish & Richardson P.C. He focuses his practice on patent litigation in the technological fields of semiconductor circuits, network communication systems, magnetic stripe emulation, antenna beamforming, and pharmaceutical products. He also has experience in pre-litigation matters, including prior art searches and claim infringement analyses. Prior to practicing law, Elliot was a research assistant at the Vanderbilt University Particle Physics Lab, where he worked with CERN researchers on analyzing particle collision backgrounds, and also worked directly on-site at the Large Hadron Collider.

Admitted only in New York. Not admitted to practice in California. Work conducted in California is directly supervised by a member of the California or is limited to federal courts or agencies authorized by law.

Focus Areas

Services

- Post-Grant
- ITC Litigation
- Patent Litigation
- Trade Secret Litigation

Industries

- Consumer Products
- Electrical and Computer Technology
- Internet
- Manufacturing
- Medical Devices
- Nanotechnology
- Standard Essential Patents
- Telecommunications
- Transportation

Education

J.D., University of Virginia School of Law (2018) *Virginia Law & Business Review*, Technical Editor

B.A., Physics and Mathematics, with minor in Scientific Computing, Vanderbilt University (2015)
