## Overview

---

### About Jesse

Jesse Gordon, Ph.D., focuses his practice on patent drafting and prosecution, as well as due diligence and freedom-to-operate studies in the chemical and life sciences industries. Dr. Gordon has extensive experience in a variety of technologies, including chemistry, chemical biology, microbiology, optics, and microscopy. Specific applications include small-molecule pharmaceuticals, catalysts, polymers and polymer materials, DNA nanotechnology, engineered peptides, electrochemistry, fluorescence imaging, and filtration technologies.

Prior to joining Fish, he held research positions at both the Massachusetts Institute of Technology and McGill University. During his graduate studies, Dr. Gordon studied bacterial chemical sensor proteins using single-molecule fluorescence methods.

## Focus Areas

---

### **Services**

- Patent Prosecution

### **Industries**

- Chemicals
- Life Sciences
- Nanotechnology

### **Education**

---

Ph.D., Chemistry, Massachusetts Institute of Technology (2021)

B.S., Chemistry, McGill University (2016)
