Overview

About John

John Bower is a technology specialist in the Boston office of Fish & Richardson P.C. Prior to joining Fish, his areas of research included relativistic heavy ion collisions, applying machine learning and bayesian statistics (Gaussian Processes) to develop software for charge balance functions. He also worked briefly in nuclear structure, modeling simple systems using object orientation in C++.

Education

M.S. *cum laude*, Physics, Michigan State University (2017)

B.S. *with honors*, *Phi Beta Kappa*, Physics, Classics, Mathematics, Trinity College (2012)
