Overview

About Karan

Karan Jhurani is an associate in the Atlanta office of Fish & Richardson P.C. His practice emphasizes complex patent litigation, patent prosecution and counseling, and post-grant proceedings before the Patent Trial and Appeal Board (PTAB).

Karan's litigation practice focuses on representing clients in actions filed in U.S. district courts across the country and at the International Trade Commission. He has substantial experience in all major aspects of litigation, including pre-suit diligence, managing discovery, deposing fact and expert witnesses, conducting cross-examination of witnesses at trial, and pre-trial and post-trial briefing. In his litigation practice, Karan has experience working with various technologies, such as microlithography and optics, portable device power management, object-relational mapping technology, microprocessor design and operation, digital image processing technology, cellular communication standards, audio and video decoding technologies, and consumer electronics (e.g., televisions, mobile phones, tablets).

Karan also has significant experience preparing and prosecuting patent applications, with many of these applications being directed to technologies that utilize Internet of Things (IoT), software as a service (SAAS), financial technologies, machine learning, artificial intelligence, big data, business intelligence and advanced analytics, relational databases, e-commerce solutions, mobile security, mobile applications, manufacturing plant operational management, and many more. In addition, Karan has assisted clients with IP portfolio assessment and IP due diligence (offensive and defensive).

At the PTAB, Karan has successfully represented both patent owners and petitioners in post-grant proceedings. In addition to petition and brief drafting in these proceedings, Karan specializes in

developing high-level case strategies and legal theories for his clients.

Prior to entering the practice of law, Karan worked as a senior consultant at IBM where he designed and implemented technology solutions (on the SAP platform) for multiple Fortune 500 companies. Through his professional experience and education, Karan is proficient in multiple software programming languages and various software design principles, including object-oriented design, multi-tier architectures, and relational database design.
